

PROFILE

Computer Science student transitioning into technology after an established career in education and learning environments. I am particularly interested in hands-on systems work: investigating user problems, testing changes, documenting solutions, improving workflows and automating repetitive tasks.

My background combines strong user communication and training experience with technical experience in APIs, Python, SQL, testing, Git/version control and web applications. I have practical experience using HR-related systems including SAP SuccessFactors and Palkka.fi, and I am comfortable learning unfamiliar tools by investigating how the system, data and user process fit together.

HR TECHNOLOGY & TECHNICAL SKILLS

Systems support & testing	Troubleshooting · issue investigation · user support · functional testing · debugging · documentation · process improvement
Technical	Python · SQL · Django · REST APIs · PostgreSQL · SQLite · Git/GitHub · Docker · automated testing · CI
Tools & workflows	Jira · Confluence · ServiceNow familiarity · SAP SuccessFactors · Palkka.fi · Excel
Learning & communication	User training · instructional documentation · stakeholder communication · translating technical information for non-technical users

PROJECTS

SkillPath Navigator — Django / REST API System2026

Live app · API & docs

- Built a Django application combining a user interface, REST API and relational job-market dataset, with validated, repeatable data loading.
- Grew the automated test suite to 44 passing tests; verified against PostgreSQL 16 in GitHub Actions CI and containerised with Docker Compose.
- Practised investigating system behaviour across interface, API, application logic and database.

Relevant skills: APIs · troubleshooting · testing · automation · data validation · documentation · version control

PROFESSIONAL EXPERIENCE

Teacher Assistant — Pilke Päiväkodit, Finland2022–2024

- Clarified and resolved issues independently for colleagues and families in a fast-moving service environment.
- Wrote practical instructions for users with varying technical confidence; used SAP SuccessFactors as an employee user.
- Designed and delivered staff learning on data protection, information security and responsible use of digital tools.

Privacy & Digital-Workplace Development Project2024–2026

- Investigated digital-tool and information-handling problems with staff, management, IT and a Data Protection Officer.
- Produced a 57-page staff guide and training materials, translating complex requirements into clear instructions.

Educator / Pedagogy Consultant — International schools & education technology2013–2022

- Supported users across classroom, online and technology-supported learning, adapting explanations to each audience.
- At LingoAce, automated the reporting system, reducing reporting time by 70%.
- Developed learning materials, documented processes and collaborated across multicultural teams.

ADDITIONAL HR / ADMINISTRATION EXPERIENCE

Small-business administration

- Used Palkka.fi for payroll and employer administration, including employee records and recurring processes.

EDUCATION

BSc Computer Science — University of LondonExpected 2027

Relevant work: web development · databases · APIs · software testing · machine learning

Master’s studies in Changing Education — University of Helsinki MA English Studies / Teacher Education — University of Helsinki

BA English Studies — University of Buckingham
